

PARKERIZING GROUP

PULS

Parker Ultimate Lubrication System

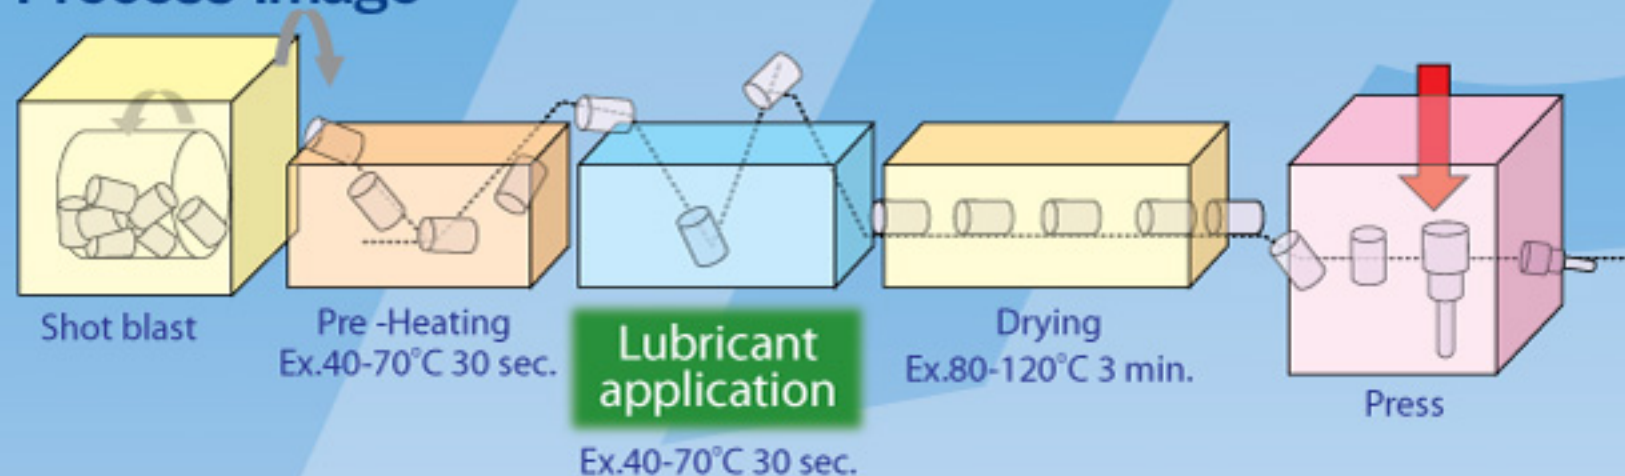

“Revolutionary system has been developed to replace lubricant on cold forming”

Waste free, water – based single process lubricant

Comparison between conventional system

	No. of process	Space	Chemical control	Cost ratio
Conventional lubricant	11	90m ³	by manual	100
P U L S	3	9m ³	by automatic	60
Advantage	73% shortening	1/10	Reduce cost	40% reduction

Process Image

Line up of chemicals

Chemicals	Appearance	Temp (°C)	CWT (g/m ²)	Characteristic	Use
FL-E720	White	RT ~70	5~15	Low coefficient friction better drying small absorbent	Sizing coining medium press
FL-E740	White	RT ~70	5~15	Better process for in line only	Med-strong press
FL-E760	White	RT ~70	10~15	Better process longer life on tool better heat resistance	Strong press
