

# PALENE SERIES

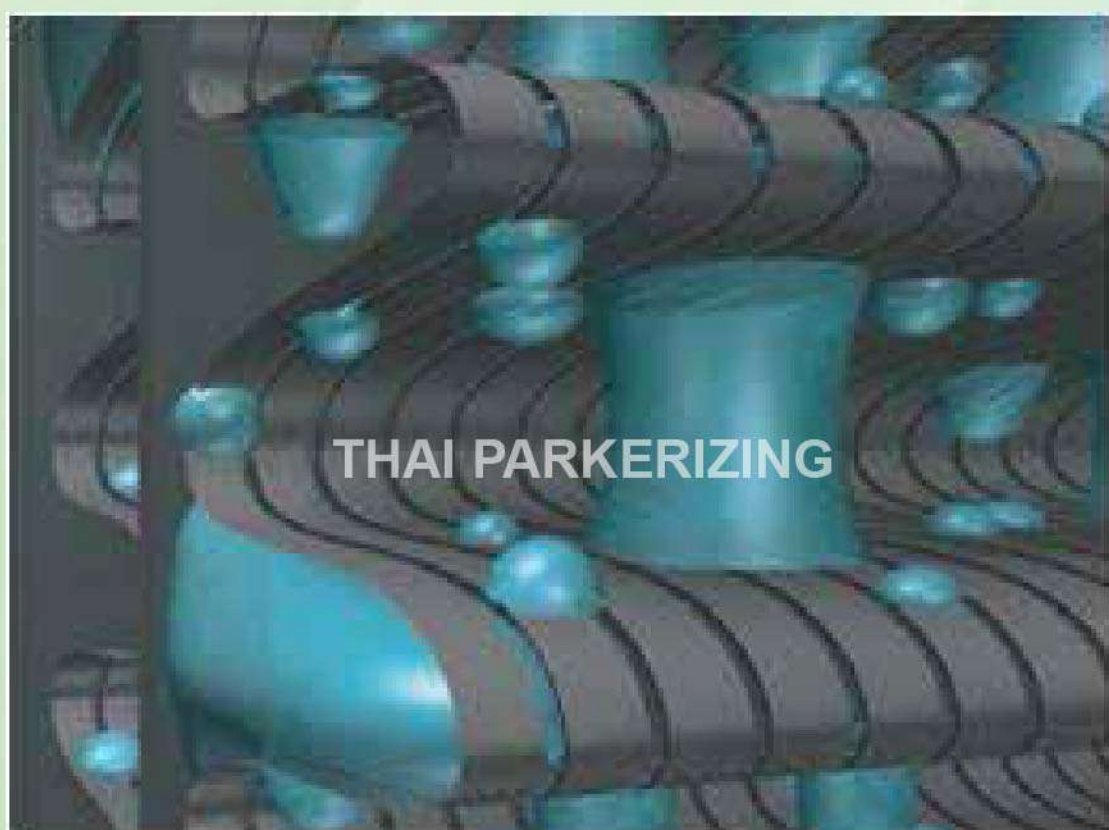

## Hydrophilic Treatment

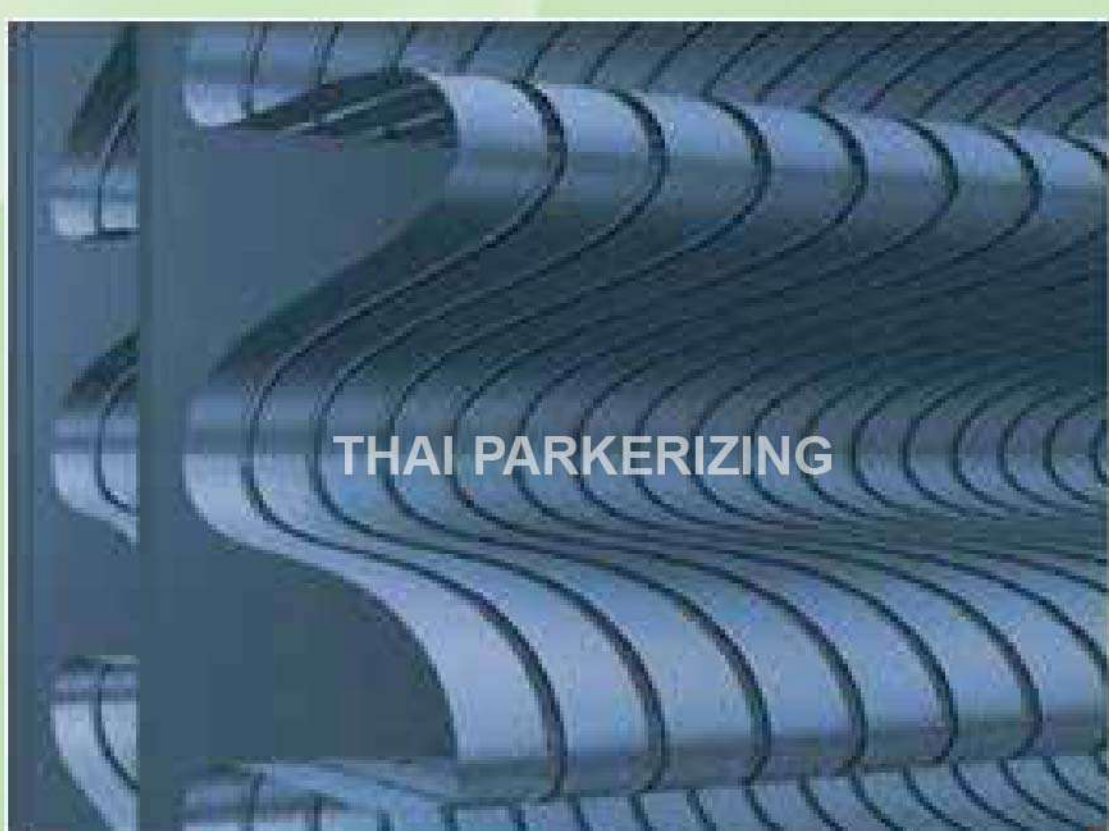

*Provision of agreeable room through hydrophilic treatment*

*Forming of corrosion and white powder*

*Forming of condensation (water drop)*

*Getting moldy*

This system enables antirust, enhancement of thermal efficiency and suppression of a stink to an evaporator by way of hydrophilic treatment film.

### Specific Features

|                               |   |
|-------------------------------|---|
| 1. Hydrophilic feature        | Enhancement of superior heat exchange efficiency    |
| 2. Corrosion resistance       | Protection against corrosion and scatter of powders |
| 3. Suppression of a stink     | Higher comfort in a car                             |
| 4. Antibacterial and antimold | Prevention against germs and mold for clean cabin   |
